General Instructions

Dime

Use the measurements from our apron size chart to determine your closest apron size. Need help finding your size? Contact us at 561.627.9769 or email sales@ protechmed.com for additional assistance.

Standard sizes shown above apply as upper limits. If your measurements fall above a size's specified limit, we recommend you size up for additional allowance, aka "wiggle room." There is NO standard size allowance added so we recommend that you incorporate an additional 1-2" of "wiggle room" for the Chest measurement.

Custom Sizing Allowances aka "Wiggle Room"

• All Styles XS to XL, by default, will be made with a +1" allowance in the Chest + Skirt waist- aka "wiggle room." • All Styles 2XL to 4XL, by default, will be made with a +2" allowance in the Chest + Skirt waist - aka "wiggle room." If you do not want "wiggle room", you must specify.

Quality Assurance Size Tolerances

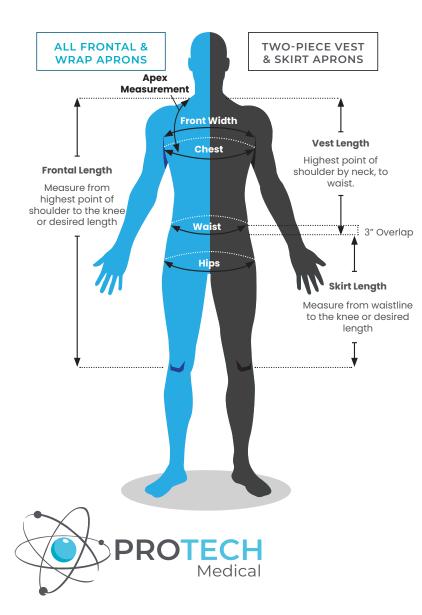

For all apron styles, our allowed size tolerances are -0 (no underage) up to +1".

Length Adjustments

Length adjustments vary depending on your height and the required length adjustment to ensure your apron reaches around your knee cap. Any additional inches (up to 6") incur extra fees.

GENERAL APRON SIZING

	xs	Small	Med	Large	XL	2XL	3XL
Height	5′2″	5′4″	5'8″	5′11″	6′2″+

Apollo Quickship aprons are only available in standard sizes. (No custom, made-tomeasure)

APRON MEASUREMENTS

CHEST MEASUREMENT

Measure around the largest circumference of the bust area, keeping the tape parallel to the floor with the client's arms at their sides.

WAIST MEASUREMENT

Measure around the smallest circumference of the torso. If you measure at waist level it may be inaccurate.

HIP MEASUREMENT

Measure around the largest circumference of the hips and buttocks with the tape parallel to the floor: generally 8–9 inches down from the waist.

SKIRT LENGTH MEASUREMENT

Measure from the top of the pant line (waist) and over the outside of the hip down to the desired length.

FRONT LENGTH MEASUREMENT

Measure from the top of the shoulder over the bust to the desired length. Do not contour the tape measure in under the bust.

VEST LENGTH MEASUREMENT

Measure from the top of the shoulder over the bust to the desired length. Do not contour the tape measure under the bust.

APEX ADJUSTMENT

Measure from the top of the shoulder (towards the neck) over the bust to the nipple. The apex measurement determines whether adjustments need to be made to the shoulder area. This helps to avoid shoulder gapping or tight arm holes in your apron. For example, a male large height of 5'10" may be fitted into a 3X due to their measurements. This would likely result in excessive shoulder material. Therefore, an apex adjustment of -1" would be applied.
